Vision :

To become a strategic partner that leads companies in their digital transformation by maintaining uncompromising product and service quality and positioning ourselves among the leading firms in the industry.

Mission :

Our mission is to achieve 100% customer satisfaction through our experienced team and to deliver efficient, sustainable solutions by leveraging the latest technologies.

Core Values and Our Differentiating Approach

Honesty and Reliability:

Building transparent, trust-based relationships in all projects.

Proactive Service Analysis:

Identifying potential issues in advance and minimizing disruptions in IT infrastructures.

Comprehensive Project Management:

Delivering projects on time, within budget, and to the highest standards.

Service Level Management (SLA):

Ensuring the quality and speed of services under committed service guarantees.

Knowledge Sharing:

Continuously informing clients about emerging technologies and best practices.

Digital Secure Workspace Technologies

- Desktop and application virtualization, remote access, and enterprise workspace solutions
- Application distribution and publishing services
- Enterprise mobility and endpoint management (UEM/MDM)
- Performance monitoring and user experience analytics

Hybrid Cloud Technologies

- Business continuity and backup
- Server and storage systems
- Network technologies

Holistic Security Technologies

- Network and infrastructure security
- Endpoint and enterprise mobility security (XDR)
- Web and cloud application security (WAF)
- API security
- Database activity monitoring (DAM)
- Remote Browser Isolation (Corporate Browser Security)

Main Service Areas (End-to-End Solutions)

VAS Bilişim specializes in four core areas to address the complex needs of businesses in IT.

1. Hybrid Infrastructure and Data Management

This area covers flexible and scalable IT infrastructures that form the foundation of the modern business world.

✔ Data Center Solutions

Installation, management, and optimization of server, operating system, storage, and backup infrastructures.

✔ Virtualization Services

Increasing resource efficiency through server, desktop, and application virtualization technologies.

✔ Cloud IT Services

Providing hybrid cloud solutions that integrate both on-premise infrastructure and public cloud services.

✔ Backup and Business Continuity

Ensuring business continuity through data storage, backup solutions, and disaster recovery (DR) planning for critical data.

2. End-to-End Cybersecurity Solutions

In line with the motto "SAFE TOGETHER," we aim to protect companies' entire digital ecosystems from cyber threats.

✔ Network and System Security

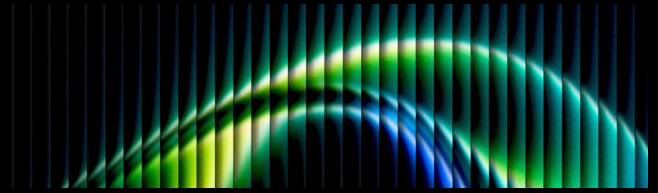

Security services including firewalls, intrusion detection/prevention systems (IDS/IPS), and SIEM solutions.

✔ Application and Vulnerability Management

Managing application security services and identifying/remediating vulnerabilities within IT infrastructures.

✔ Information Security Management Services

Supporting the implementation of information security management systems in compliance with corporate standards and certification requirements.

3. High-Performance Network and Communication Solutions

We optimize network infrastructures to ensure business processes run quickly, seamlessly, and securely.

✔ Network Infrastructure

Design and deployment of Local Area Network (LAN) and Wide Area Network (WAN) services.

✔ Network Optimization

Maintaining consistently high network performance through bandwidth management, load balancing, and application acceleration services.

✔ Workload Management

Ensuring accessibility of critical applications with server load sharing (load balancing) services.

4. Managed Services and 24/7 Support

We provide expert resources and support services to ensure uninterrupted IT operations 24/7.

✔ 24/7 Technical Support

Immediate intervention for issues through round-the-clock remote or on-site technical support services.

✔ Outsourcing Services

Providing businesses with outsourced IT teams to help them focus on their core operations.

✔ Consulting Services

Expert consulting in strategic IT planning, architectural design, and technology roadmaps.

High Customer Satisfaction

We have achieved over 90% NPS (Net Promoter Score) among our corporate clients.

Solution and Process Focus

We provide measurable results through our expert teams, not only with products but also with end-to-end solution approaches.

Strategic Global Partnerships

We deliver the latest and most reliable solutions in Turkey through strong collaborations with selected global technology manufacturers.

Maximum Quality Standards

By adopting the highest standards in service and product quality, we support our customers in achieving secure and sustainable growth.

High-Accessibility with Flexible Solutions

Thanks to our advanced technology infrastructure, we can offer fast and scalable project services.

Continuous Innovation

By closely following developments in global technology trends and ecosystems, we continuously develop innovative and reliable solutions.
